The U.S. Bioscience Economy:

Advancing Innovation and Strengthening States and Regions

Nebraska's bioscience industry is specialized in its employment concentration and diverse in its strengths. The industry accounted for 19,163 jobs across 1,577 business establishments in 2025. Nebraska retains a diverse set of bioscience specializations, with outsized employment concentrations in agricultural feedstock and industrial biosciences, distribution, and medical devices and equipment. Agricultural bioscience employment is more than six times as concentrated as nationally, while the overall industry's concentration is 30 percent above the national average. Employment increased by 5.5 percent from 2021, with gains in four major subsectors, including double-digit job growth in pharmaceuticals and in distribution. Average annual industry wages were $93,472, 48 percent higher than Nebraska's private sector average. Nebraska universities conducted $492.3 million in bioscience-related R&D in FY 2024, representing 73 percent of science and engineering research expenditures. State institutions received $140.9 million in NIH funding in FY 2025. Venture capital investments in Nebraska bioscience companies totaled $747.1 million from 2021 through 2025.
